

ABZED MOHAMMED

I am a Software Engineer and Cloud Developer with 2+ years of experience developing awesome web applications. I primarily tend to lean towards using Django and Ruby on Rails as my backend languages and React and Angular for my frontend. I enjoy developing eye catching UI/UX and playing around with different cloud infrastructures and technologies. I've also worked as a team lead in various projects. I am a team player and a fast learner very flexible to work as a frontend or backend developer.

Vercel | Netlify
Tailwind & Bootstrap
Cloudinary
AWS | GCloud | Azure

WORK EXPERIENCE

Technical Instructor

Moringa School | 2022

- Worked as a lecturer and guide supporting tech students on the best programming practices and writing clean reusable codes
- Worked on educational based projects to streamline learning experience
- Created learning materials, this includes pre-recorded videos, articles and automated test programs to test different application behaviors

React Front-End Developer

Menj Therapeutic | 2022

- Worked on Figma designs of a health management system where doctors can manage their client records. Book appointments and track payments and invoices
- Created authentication and verification pages, including two factor authentication. Also worked on dashboard pages while integrating with backend API.

Fullstack Developer

Buildsoko | 2021

- Worked as a solo developer for an e-commerce backend system with Django and PostgreSQL database.
- Created all the frontend pages, routing, logic and connected the backend to work with the frontend efficiently.

Analyst

Digital Divide Data | 2020

- Data quality review
- AI Machine learning data analysis
- Document conversions from pdf to HTML
